

*Teachers from the Strait Regional School Board participate in the StFX Certificate in Outdoor Education*

The Certificate in Outdoor Education (COE), offered by the StFX Faculty of Education and Continuing & Distance Education Program, is designed for physical education teachers, elementary classroom teachers, and teachers from various grades and subjects, to use specialized equipment and develop specific skill sets not typically a part of physical education programs. The complexity of outdoor education involves skill proficiency for the teacher, current standards associated with particular activities, depth of knowledge required to allow for cross-curricular application, and strategies to allow for inclusion practices.
